

Hot-galvanized product

Type	Characteristics
Type of coating	Zinc
	Aluminum zinc alloy
Mode of coating	Zinc coating for double side 60~440g/m ² , Zinc coating of one side 30~220g/m ²
	Aluminum zinc alloy coating 40~275 g/m ² (double side)
Thickness scope	Steel band thickness: 0.25~2mm; Steel band width: 750~1300mm
Steel grade	Drawing: common, drawing, deep drawing, ultra deep drawing,
	Cold forming high strength steel: 180~420MPa (yield strength)
	Structural strength: 220~350MPa yield strength)
